

GURU SAI HANEESH CHAGALAMARRI

gurusaihaneesh108@gmail.com | +1 3466686693 | Houston, TX 77054

Summary

Dynamic AI Product Manager with a proven track record at Manifestecx, driving product strategy and roadmapping. Expert in LLMs and agentic workflows, I accelerated feature releases by 40% and achieved an 87% task success rate through user-centric design and cross-functional leadership. Passionate about transforming complex challenges into intuitive solutions.

Skills

- Product Strategy & Roadmapping
- AI Prototyping & MVP Building
- LLMs, Fine-Tuning & RAG
- Agentic Workflows & AI Agents
- API Integrations & Automation
- User Research & Experience Design
- Cross-Functional Team Leadership
- Go-To-Market Planning
- Visual Product Presentation
- Marketing and Analytic Skills
- Generative AI

Experience

Manifestecx | Houston, TX

AI Product Manager

02/2025 - Current

- Spearheaded the development of **Oplay**, an AI automation platform powered by MCP (Model Context Protocol), enabling non-technical users to automate workflows through natural language.
- Designed and prototyped God Eye, a screen intelligence tool that lets users screenshot any app and ask questions directly about the content.
- Defined product roadmaps, collaborated with AI engineers, and UI/UX teams to accelerate feature releases by 40%.
- Integrated LLM-based agentic workflows and Retrieval-Augmented Generation (RAG) pipelines to power contextual automation in business tools.
- Led beta launches, user feedback loops, and iterative improvements, resulting in an 87% task success rate during early adoption.

Education and Training

Trine University | Angola, IN

Master of Science in Engineering Management

05/2025

Projects & Achievements

God Eye – AI-Powered Screenshot Analyzer

Built a utility that uses OCR + LLM + Vision AI to let users screenshot any screen and ask contextual questions.

→ Tech: OpenAI Vision API, OCR, Electron

Oplay – Agentic AI Automation Platform

Designed and product-led the creation of Oplay — a plug-and-play interface that lets users automate actions across apps via conversational prompts.

→ Tech: Node.js, LLMs, custom agent manager, API connectors

Technical Skills

LLMs: OpenAi , Claude, Mistral, Fine-tuning

AI Tools: Hugging face, RAG, Vector DBs , OCR, N8N

Development: Node.js, JavaScript

Platforms: Firebase, GitHub, REST APIs

No Code Tools: Cursor, Lovable, Google Ai studio
